RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: . . . the peritoneum may be. , cut when the operator is ready to sever the tubal attachment. Through the hole thus made the ovaries and tubes may be brought down, ligated and cut away as in an ordinary vaginal hysterectomy. The peritoneal opening is then closed with catgut and the cavity is packed. From an experience covering a large number of vaginal hysterectomies by clamp and by ligature, and from my observations in the four cases in which I have tried this method, I must say I believe that in suitable cases enucleation is the ideal method for vaginal hysterectomy, and I can agree with Pratts conclusions: First. The loss of blood is trifling, and as the vessels are not injured they remain to repair the wounded parts, which they do with rapidity and completeness. Second. Diseased tissue is not disturbed, the uterus not being mutilated or even wounded, the entire organ being removed intact. Third. If by accident a blood vessel is cut it is so perfectly in the field of operation that it can readily be secured by forceps and tied without injuring the neighboring nerve fibres. Fourth. There is no pinching of the sympathetic and spinal nerve fibres by clamp or ligature; consequently there is no shock following the operation--Emory Lamphear, M. D. , of St. Louis, Mo. , in St. Joseph Med. Herald. Collect Your Faire. --When a young man appears in your office, Doctaire, Anil with a mysterious and difficult aire Informs...
